dattadhanasure22@gmail.com

Skills

Languages: Java, JavaScript, SQL

Backend: Spring Boot, Microservices, Hibernate, Kafka, RESTful APIs

Frontend: React.js, HTML, CSS, Bootstrap

Databases: MySQL, Redis

Cloud: AWS (EC2, S3, Lambda), Linux

DevOps & CI/CD: Docker, Jenkins

Tools & Platforms: Git, Maven, JIRA, MS Teams

Results-driven Java Full Stack Developer with 3.8 years of experience in designing, developing, and maintaining scalable applications in the Insurance domain. Proficient in backend technologies including **Java, Spring Boot, Microservices, and SQL**, with good knowledge of React.js, Kafka, and AWS.

Experienced in developing REST APIs, implementing business logic, and working with databases to deliver reliable and high-performance applications. Familiar with CI/CD pipelines, Docker, and Agile/Scrum methodologies. Strong problem-solving skills with the ability to collaborate effectively within cross-functional teams and contribute to project delivery and application support.

Experience

Capgemini Technology Services India Limited

Software Engineer

Dec 06 2023 - Till now, Hyderabad

Qualitas Global Services

Software Engineer

Aug 16 2019 - Dec 09 2020, Pune

Project 1: Insurance Workflow Application

- Developed and configured **workflow processes in Case360**, including task routing, business rules, notifications, escalations, and approvals.
- Built custom microservices using **Spring Boot** to handle backend processing, validations, and integration logic for workflow components.
- Integrated a **PDFA document conversion service** (built using Spring Boot) to automatically convert uploaded documents into **PDFA-compliant formats** before storing them in the Case360 document repository.
- Consumed and exposed **RESTful web services** for secure data exchange between Case360, external policy databases, and internal APIs.
- Designed database models and executed complex queries using **SQL Server** to support workflow metadata and case tracking.
- Participated in requirement gathering sessions with stakeholders to translate business processes into technical workflow logic.

- Ensured compliance with **security standards, audit trails, and role-based access control** for sensitive insurance data.
- Conducted **unit testing**, collaborated on UAT with QA teams, and supported production deployments and post-deployment troubleshooting.

Project 2: Health Insurance System (HIS)

- Collaborated in **requirement gathering, analysis, design, and development** phases in an **Agile/Scrum** environment.
- Developed new **features and enhancements** across multiple modules, ensuring compliance with state and federal healthcare regulations.
- Built the **persistence layer using Spring Data JPA** to manage entity relationships and database operations.
- Designed and implemented **RESTful web services** to support seamless integration with front-end applications and third-party systems.
- Worked on **controller and service layers**, applying validation logic and ensuring secure data flow between components.
- Managed **bug tracking and issue resolution**, collaborating with QA teams to maintain software quality.
- Wrote and maintained **unit test cases** using **JUnit** and **Mockito**, achieving high code coverage.

Education

Bachelor of Engineering (B.E) -
Mechanical Engineering

Bharati vidyapeeth college of engineering, kolhapur

Awards & Recongnitions

Rising Star Award, [Capgemini], March 2024

GEM (Going the Extra Mile) Award, [Capgemini], 2024-2025
